SOA EXAM

Probability (P), Financial Mathematics (FM), Fundamentals of Actuarial Mathematics (FAM), Statistics for Risk Modeling (SRM)

EDUCATION

Georgia State University, Robinson College of Business <i>Master of Actuarial Science: GPA 3.9/4.0</i>	Atlanta, GA, USA Jan 2026 – May 2027(Expected)
Columbia University, Graduate School of Arts and Sciences <i>Master of Arts in Economics: GPA 3.85/4.3</i>	New York, NY, USA Sept 2024 – Dec 2025
Zhongnan University of Economics and Law, Wenlan School Of Business <i>Bachelor of Economics, major in Economics and Finance: GPA 3.95/4.0</i>	Wuhan, Hube, China Sept 2020 – June 2024

PROFESSIONAL EXPERIENCE

Research Assistant <i>Georgia State University</i>	Atlanta, GA, USA Jan 2026 – Now
--	------------------------------------

- Collected, cleaned, and structured research datasets for empirical causal-inference projects
- Built and estimated regression models to examine relationships between key variables and research outcomes
- Conducted endogeneity checks, robustness tests, and alternative model specifications to validate empirical findings

Event Coordinator <i>Actuarial & Risk Management Association</i>	Atlanta, GA, USA June 2026 – Now
--	-------------------------------------

- Coordinated ARMA events by communicating with guest speakers, campus offices, and board members
- Managed event logistics, including room reservations, member promotion, parking validation, and on-site execution
- Prepared weekly updates and event reminders for 300+ members through PIN and Outlook

Quantitative Investment Intern <i>Yingda Securities Co., Ltd.</i>	Shenzhen, Guangdong July 2023 – Aug 2023
---	---

- Queried databases with SQL and used Python to build 6 quantitative factors for investment analysis
- Processed 10M+ records with Python and developed index-closing-price estimation code with error within 1.5%

Investment Bank Department Intern <i>Guotai Junan Securities Shenzhen Branch</i>	Shenzhen, Guangdong (Hybrid) Dec 2022 – May 2023
--	---

- Supported the IPO project of a major PCB company through document management and daily project coordination
- Researched PCB industry trends, market news, and peer companies to contribute to monthly industry reports
- Reviewed financial statements of companies through Wind and developed case reports to support internal analysis

PROJECT EXPERIENCE

Term Life Cash Flow Pricing Model	June 2026 - July 2026
--	-----------------------

- Priced a 20-year level term product in R: 432-cell rate table (ages 25-60, 4 risk classes) solved to 7% PV profit
- Modeled cohort cash flows on a 2015 VBT basis with graded lapses, 4.0% discount, and full expense and tax loads
- Stress-tested two ways: repricing needed +6.5% premium; locked premiums cut margin 7% to 0.11%, break-even 1.1016x

Health Cost Prediction Model	June 2026 - July 2026
-------------------------------------	-----------------------

- Engineered 62 features from 100,000 insurance records in R, excluding financial-outcome columns to prevent leakage
- Benchmarked 11 models from OLS to XGBoost, LightGBM, and a stacked ensemble; ElasticNet best at RMSE \$2,947
- Decile calibration held despite individual R-squared of 0.177: actual cost rose ~\$1,500 to ~\$6,000 monotonically

HONORS & AWARDS

- Finalist Award — International Mathematical Modeling Contest (2023)
- Meritorious Award — Mathematical Contest in Modeling (MCM) (2023)
- Excellence Award — Post-COVID-19 Risk Warning Model Competition (2023)

SKILLS

Language:	English (Fluent), Chinese (Native), Japanese (JLPT N2)
Technical Skills:	R, Python, SQL, MATLAB, STATA, Excel, Tableau
Actuarial:	Gross premium pricing, mortality and lapse modeling, stress testing, risk classification
Certifications:	Data Analyst in SQL (Data camp), Machine Learning (Coursera)
